Dear Sir

As an important enabler to further our innovation and technology aspirations by engaging academia to participate in our plant's chronic issues through taking up collaborative projects, in July last year, we engaged M Tech students of premier technical institutions of the country . These students undertook projects in various departments/divisions of our company in the form of paid internship for a period of one-year as a part of their 2nd year curriculum of the 2-year M Tech program. We also offer a stipend to the students during the project period. The students also have the option of availing company accommodation for which there may be nominal deduction in the stipend amount.

We are in the process of contacting all the premier colleges of the country for offering the one-year internship to their M Tech students for the two semesters **starting July 2021**. In reference to the above we seek the CVs of candidates who would be interested to leverage this opportunity in TSL. The list of interested students with their CVs can be sent to us for our scrutiny and selection through an interview process (telephonically).

In case of any clarifications, you may contact the undersigned.

Regards

Charu Khullar
Manager
Capability Development, HRM
