

GET-MAID

household services

EASY. QUICK. AFFORDABLE

ABOUT THE COMPANY

GET-MAID is a general B2C online household services provider that ranges from long term services like maids, cooks, caretakers to short term instant services like running errands or delivery of various items from your nearby store. The services can be availed according to the needs and the entire end to end management will be undertaken via one of the most interactive application that will be available to the users.

Furthermore, the lack of availability of such services in the tier 2-3 cities, a wide spectrum of target customers and rapidly expanding market for the same points towards this being a promising venture in the long run.

VISION OF THE COMPANY

- Enhance the overall quality of existing households services available in all the three tier cities.
- Uplift the livelihood of the working section at levels of the society
- Provide speedy services at the doorstep, without having anyone step out of their homes.
- Provide the widest range of customers with a whole different experience via highly interactive and user-friendly features on one-of-a-kind platform

MAJOR SECTIONS

The platform that we are planning to build will have two major sections.

Premium service section

- designed for **nuclear families, senior citizens**
- **long term services** such as maids, cooks, caretakers can be availed

Instant service section

- designed for **students and bachelors**
- **short term services** such as running errands or delivery of various items from your nearby store

USP at a glance
