

ABOUT THE WORKSHOP

Outcome-based education (OBE) is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience, each student should have achieved the goal. There is no single specified style of teaching or assessment in OBE; instead, classes, opportunities, and assessments should all help students achieve the specified outcomes. The role of the faculty adapts into instructor, trainer, facilitator, and /or mentor based on the outcomes targeted. NBA Accreditation is now a days essential to all the technical institute. This workshop will enrich the knowledge of participants towards OBE and NBA Accreditation processes
